

Blueberries are, to a degree, self-fruitful. However, we recommend planting at least two different varieties to optimize fruit production (larger berries & larger yields). Choose two to three varieties with identical or adjacent bloom times for best pollination

Variety	Plant Size	Fruit Size	Bloom Time	Ripens	Fall Color	Additional Information
Bluecrop	Northern highbush. Upright & open. 4'-6'	Large	Mid	Mid July to early August	Fiery red.	Good for fresh eating, preserves, baking & freezing
Bluejay	Northern highbush. Upright. 6'-7'	Medium	Mid	July	Orange to yellow. Bright yellow	Best for freezing, pies, and canning.
Blueray	Northern highbush. Upright & open. 4'-6'	Very large	Mid	Mid July	Brilliant red & yellow	High quality berries with outstanding dessert flavor.
Chandler	Northern highbush. Slightly spreading. 5'-7'	Largest	Mid - late	Mid July through August	Wine and Orange	World's largest blueberry. Best fresh or as a dessert.
Duke	Northern highbush. Upright. 4'-6'	Large	Early	Early to Mid July	Orange to burnt yellow	Use for baking and eating fresh. Full, rich flavor.
