

Grapes are self-fertile, vigorous growers. They require a sturdy arbor or trellis, full sun, and deep, well draining soil. Grape vines need plenty of room to grow ( 7-8' apart, 8-9' between rows ) and regular pruning (fruit forms on one-year-old wood). Fertilize sparingly in the spring with a slow release fertilizer. Vines requires 2-3 years to produce a good harvest.

## Table Grapes

Variety	Ripens	Fruit Size	Clusters	Fruit Color	Flavor	Description
Black Monukka	August to September	Large	Large, long clusters	Black	Sweet, delicious, rich flavor	Good for fresh eating and raisins
Canadice Seedless	Mid August	Medium	Large clusters 6-8" long	Red	Sweet with a hint of spiciness	<b>Seedless.</b> Great for fresh eating, jellies, juice and wine.
